

CLAY SHOOTING ANALYSIS

Shoot Log

Smartphone Operation Manual
Version 2.21.0

Actual app screens are shown at a readable size for each task. Long screens are automatically scrolled to the relevant section and captured separately.

QUICK START

What to know first

- Every change is saved immediately on this device.
- While signed in, records sync to the cloud automatically.
- Save a JSON backup regularly as an independent copy.

Screens are actual React components displayed at smartphone width in manual capture mode. All data is fictional.

INSTALL / LOGIN

Install and sign in

- Add Shoot Log to the Home Screen or Dock from Safari, Chrome, or Edge.
- Sign in with your email address and password.
- Never share authentication or password-reset links.

Screens are actual React components displayed at smartphone width in manual capture mode. All data is fictional.

APP INSTALL

View steps

Install as an app

Launch from your Home Screen or Dock like a regular app.

Follow the steps for your browser. Removing the app does not delete cloud records.

Safari

iPhone / iPad

1. Tap Share
2. Choose Add to Home Screen
3. Enable Open as Web App
4. Tap Add

Mac

1. Choose File in the menu bar
2. Choose Add to Dock
3. Click Add

Chrome

Current browser

Computer

1. Open the top-right menu (☰)
2. Choose Cast, save and share
3. Choose Install page as app

iPhone / iPad

1. Tap Share
2. Choose Add to Home Screen
3. Tap Add

Android

1. Open the top-right menu (☰)
2. Choose Add to Home Screen
3. Tap Install

Edge

Computer

1. Open the top-right menu (...)
2. Open Apps
3. Choose Install this site as an app

CLOUD SYNC

Sync across devices

Automatically sync records between signed-in computers and phones. You can enter scores offline and sync when the connection returns.

Not connected

SCORING

Enter each target

- 1 records a first-shot hit and 2 records a second-shot hit.
- 1+ records a first-shot hit followed by an extra second shot: one point and two shells.
- Miss direction means the target's flight direction. Entry advances automatically.

Screens are actual React components displayed at smartphone width in manual capture mode. All data is fictional.

OPTIONAL AI ANALYSIS

Analyze with your own AI

- The export includes scores, conditions, and your written review.
- Dates, range names, firearm identifiers, and personal identity are excluded.
- Review the copied content and send it yourself.

Screens are actual React components displayed at smartphone width in manual capture mode. All data is fictional.

SESSION PACE

Pace and stand analysis

- Compare hit rates between the first and second halves.
- Compare hit rate and missed target-flight direction by stand.

Screens are actual React components displayed at smartphone width in manual capture mode. All data is fictional.

REVIEW

Post-session review

- Record what you noticed, what did not work, and what to try next.
- Keeping concerns in the record provides context when asking an AI for help.

Screens are actual React components displayed at smartphone width in manual capture mode. All data is fictional.

90% 18/20

REVIEW

Post-session review

What you noticed

In the second half, I stayed calm and saw the target before moving.

What did not work

I sometimes moved too early on right-going targets.

Next attempt

Settle my breathing and confirm the target before moving.

Save review

Back to history

HISTORY ANALYSIS

Condition and ammunition trends

- Filter history by range, ammunition, fire mode, and period.
- Check both condition differences and sample size; treat small samples as indicative.

Screens are actual React components displayed at smartphone width in manual capture mode. All data is fictional.

MASTER DATA

Manage saved items

- Add or rename shooting ranges and ammunition products.
- Renaming is reflected in past history.

Screens are actual React components displayed at smartphone width in manual capture mode. All data is fictional.

AMMUNITION LEDGER

Manage ammunition

- Record ammunition received, used, and remaining; completed sessions are added automatically.
- Confirm category, firearm, and date range before output.

Screens are actual React components displayed at smartphone width in manual capture mode. All data is fictional.

AMMUNITION LEDGER

Ammunition ledger

Records ammunition received, used, and remaining in the Kanagawa format.

Backup independent of cloud sync

In addition to cloud sync, save a JSON backup regularly.

SUPPORT

If something goes wrong

- If data does not sync, check the connection and signed-in account.
- If the screen is outdated, use the update notice or safe recovery.
- Never include passwords or firearm permit numbers in support email.

Screens are actual React components displayed at smartphone width in manual capture mode. All data is fictional.

SUPPORT

Contact support

Shoot Log Version 2.21.0

Back to account

Contact by email

The button opens an email draft containing the information needed for support.

Create support email

Try these first

- Cannot sign in: send a reset email from Forgot password.
- Data not current: sign in to the same account and press Sync now.
- App not updated: use the update notice, then fully close and reopen the app.
- Before changing data: save a current JSON backup.

What to include

- Device and browser
- Date, time, and action immediately before the issue
- The complete message displayed
- Whether the same steps reproduce the issue
- If needed, a screenshot with personal information hidden

VERSION HISTORY

Major versions

Version 2.21.0: Added Japanese and English throughout the app and an English operation manual.

Version 2.20.0: Added 1+ to record an extra second shot after a first-shot hit.

Version 2.19.14: Added separate actual screens for round preparation and score entry.

Version 2.7.6: Improved manual saving on iPhone without leaving the app.

Version 2.0.0: Added Supabase accounts and cloud sync.

Version 1.0.0: Integrated PWA, score PDF, ammunition, and permit deadlines.
